EDUCATION

University of Bonn

M.Sc. Computer Science · Intelligent Systems & Algorithms · Current grade: 1.1 (1.0 = best)

Bonn, Germany

Oct. 2025 – present

Universidad Politécnica de Madrid (Upcoming)

Exchange Semester, M.Sc. Computer Science

Madrid, Spain

Feb. 2027 – Jun. 2027

University of Bonn

B.Sc. Computer Science · Graduated with distinction · Grade: 1.2 (1.0 = best)

Bonn, Germany

Oct. 2022 – Sep. 2025

Rhein-Sieg-Gymnasium

Abitur (Grade: 1.0) · Semester Abroad at GISSV (CA), USA

Sankt Augustin, Germany

Aug. 2014 – June 2022

EXPERIENCE

Internship (Upcoming)

DHL Group · Deutsche Post P&P

- Operations Research for logistics and planning problems
- Development and deployment of an agent-based retrieval system over internal databases and knowledge graphs

Bonn, Germany

Oct. 2026 – Dec. 2026

Student Research Assistant

Fraunhofer Institute FKIE

- Research on online combinatorial optimization for routing and resource allocation
- Derived adversarial disruption scenarios on a Germany-wide routing graph extracted and contracted from raw OSM data
- Implemented heuristics as reference points for Graph Reinforcement Learning policies

Wachtberg, Germany

Nov. 2023 – Sep. 2026

Formula Student Team Member

Bonn-Rhein-Sieg University of Applied Sciences (HBRS)

- Aerodynamic design and development of the rear wing for the team's 2024 race car

Sankt Augustin, Germany

Sep. 2023 – Jun. 2025

PUBLICATIONS

Reinforcement Learning Amplifies Emergent Misalignment from Harmless Rewards

- Co-author · submitted to EMNLP 2026
- Implemented and evaluated mitigation techniques against RL-induced emergent misalignment

May 2026

Multi-Agent Reinforcement Learning for Complex and Dynamic Graph-Based Planning Problems

- Co-author · accepted at ICMCIS 2026
- Demonstrated that Graph Reinforcement Learning policies can effectively solve complex, dynamic planning problems such as the Airlift Planning Problem

May 2026

Airlift Challenge: A Competition for Optimizing Cargo Delivery

- Co-author · 2nd-place submission to the 2024 AFRL Airlift Challenge
- Designed and implemented the core routing approach for coordinating heterogeneous aircraft across dynamic networks with bottlenecks and disruptions

April 2025

HONORS

Deutschlandstipendium

Federal Ministry of Education and Research

- Two-time recipient for outstanding academic performance

Bonn, Germany

Oct. 2024 & Oct. 2025

SKILLS

Programming Languages: Python, C++

Libraries & Frameworks: PyTorch, NumPy, Pandas, Gymnasium, NetworkX

Tools: Git, Linux, Slurm, Docker, OR-Tools

Languages: German (native), English (C1), Spanish (B1)
